

Jack Plug Socket Change

Equipment Needed:- 13mm (1/2 inch) Socket Spanner

In order to change the Jack Plug socket on your Classic/Classic Legend you will need to carry out the following instructions.

1. We only need to work on the main chassis so don't worry about the handle as this will get in the way.
2. Turn the chassis upside down and you will see a white connector block, this needs to be unplugged, pull the connector apart, not the wires.
3. Where you plug your jack plug cable in on the top of the chassis you will need to undo the 13mm nut in the recess.
4. Remove the nut and the Jack Plug Socket will then be able to be removed from underneath.
5. Fit the new Jack Plug Socket and tighten the nut, this needs to be hand tight only.
6. Connect the white connectors and tuck away neatly into the recess on the underside of the chassis.
