

Instructions how to fit new battery lead – GSP100810

Equipment Needed: - Stanley knife/Sharp Knife, Cross Headed Screwdriver, 6mm Spanner and a Hair Dryer

In order to change the leads on your existing battery you will need to carry out the following instructions.

Care and attention must be given to ensure that the red wire is connected to the red terminal and black to black.

1. Cut away the existing heat shrink using you knife, please take extra care when using sharp knives.
2. Remove the existing leads by undoing the screws/bolts from both terminals.
3. Fix the new leads to your battery ensuring the red lead goes to the red terminal and the black to black, now tighten the 6mm bolts to a firm hand tight.
