

## Compact + Potentiometer Change

Equipment Needed – 13mm spanner, 11mm spanner and a selection of screwdrivers.

In order to change the Potentiometer on your Hill Billy Compact + you will need to carry out the following instructions

1. Remove the top part of the handle, to do this you will need to remove the five screws underneath the handle and the two screws on the top of the handle
2. The handle should come apart exposing the Potentiometer (blue), remove the Pot from the handle
3. Remove the green collect knob by undoing the 11mm brass nut and pull the green collect knob from the Pot
4. Undo the handle wire that goes into the Pot connector block
5. Connect the handle wires to the new pot, it does not matter which wire goes into which connector block
6. Fix the collect knob (green cap) onto the end of the pot and fit pot back into the handle
7. Put the top of the handle onto the bottom and fit all seven screws, the five smaller screws are fitted underneath the handle
